The Industry Has found The key...

There is no doubt that keys and locks are vital to the casino industry. Despite their evident importance, almost none of the casino organisations have a real key & lock plan which is a unique service that suppliers of casino parts usually do not provide.

35 years of experience in lock smithing and casino expertise come together at CLS, who has supplied its unique services to a multitude of casinos in Europe and overseas.

CLS makes the key and lock plan according to the procedures and different employees on the floor of each individual Casino.

CLS assembles the keys and locks in their own premises, enabling fast efficient and secure service.

CLS prefers to work with BiLock a high security locking system with patented key, developed and manufactured in Australia

The widest range of lock-types

Costs will be saved...

Money will be saved...

The CLS solution...only one key per employee!

CLS has the widest range of lock-types to ensure a solution for all the applications, both for slots and table department as well the building.

All the employees end up with only one key each.

This is a basic safety feature and preferable to large bunches of keys.

Each department or sensitive key has an individual coloured key head which helps to keep good control of keys.

Costs will be saved having one system installed directly by all the different suppliers.

In this way several successful projects have been completed including Casinos Austria International and Holland Casino International.

Money will be saved in the future when a code of a lock has to be changed due loss of a key or based on new procedures.

Cores and keys with a new code can be made, shipped and installed in the Casino in seconds with a special Quick Change Core-key. This all without dismantling and assembling the total lock from the machine.

Who's CLS

CLS was founded in January 1999 as a joint venture between Sjaak van der Meer and Ronald Brouwer.

Sjaak van der Meer

Sjaak van der Meer and his company, Van Der Meer Sleutelservice, have been in the locksmith business for more than 35 years. Since 1984, van der Meer Sleutelservice has been chosen as supplier of locking systems to Holland Casino when they started developing their own systems for the table game department.

Since 1991, van der Meer Sleutelservice has been supplying all the keys and locks for the various Holland Casino buildings and since 1995 also all security locks for the slots department.

Ronald Brouwer

Ronald Brouwer worked with Holland Casino for almost 13 years with the last 9 years spent in the gaming department at Holland Casino headquarters. He was responsible for all gaming equipment, procedures and processes, R&D and installations in the casinos, and was instrumental in the opening of 11 new casinos. During that time, in close consultation with Van Der Meer Sleutelservice, they developed many solutions to problems relating to locking systems for gaming tables, slot machines and building security.

Having started with Holland Casino more than 35 years ago, CLS have in the meantime supplied their locking systems solutions to casinos all over the world counting international groups such as Casinos Austria International, Admiral Casinos, Merkur Spielbanken, Swiss Casinos, Aspers Casinos and Casino Cosmopol to their valued customers.

Why CLS

CLS provides an integral security concept for your casino operation.

As a reliable partner, CLS provides professional expert advice and offers custom-made solutions.

CLS perfectly combines expertise in lock smithing with in-depth knowledge of the casino industry and its specific security issues. This unique combination assures casino owners and directors of the best and most efficient solution to any locking problem.

CLS stands for fast, efficient and secure service as they hold sufficient stock to meet customer needs, cylinders and keys are assembled on their own premises to guarantee fast delivery around the world.

CLS provides the full range of products for the protection of your funds such as locks and keys, cash and tip boxes, coin cassettes, security seals, seal bags, key safes, safes, trolleys and anything else you might require containing a lock!

How does CLS work

CLS will issue a key & lock plan according to your requirements and security concepts.

Whenever possible, CLS coordinates the factory fitting of the locks with the various manufacturers. Costs will be saved by having one system installed by all the different suppliers to your casino.

In order to guarantee a smooth installation CLS also ships its toolset which is a mobile workshop with the delivery of goods. Apart from all the necessary tools the toolset contains extra locks of all the models. These can be used for on-site installation of extra lock positions should that be necessary.

Just before the opening specialists of CLS come on site to fit the last locks. All the different coded lock-plugs are installed into the lock-housings. Accessory parts or equipment are installed like key safes, cash and tip boxes, trolleys and others.

...How does CLS work

At the end of the installation process, the responsible technicians of the casino receive a technical training. The keys in operation and spare keys are organised in the key safes and the systems master/installations key is handed over.

CLS locking systems can be easily maintained by the local technicians. Thus the casino is self-supporting and does not need a service contract nor the return of CLS specialists to the site.

CLS offers another major advantage with a special Quick Change Core-key. If a lock code has to be changed due to loss of a key or based on new procedures, cores and keys with a new code can be installed in the casino in seconds with a special Quick Change Core-key without having to dismantle and re-assemble the entire lock from the machine.

Why Key And Lockplanning

CLS makes the key and lock plan in cooperation with casino owners/directors and according to the procedures and different employees on the floor of each individual casino.

All the employees are provided with only one single key. This is a basic safety feature and preferable to large bunches of keys.

One person with his own individual key may access different applications.

Locks can be programmed to be opened with several different keys or by employees of different departments if and when required.

- **Sample of a lock chart (key & lock plan)**
The matrix is a sample of a casino key & lock plan.
- **Samples of a slot machine key & lock plan**
Two samples are attached to visualize a slot machine key & lock plan, plus an empty lock plan for your convenience!

Below you'll find a sample of a lockchart. According to the procedures in the Casino the lockchart will vary.

The lockchart tells you on one side all the different keys and key-users on the other side all the applications.

The crossings in the lockchart tells you which person/key has access where. One person with his individual key can have access into different applications. Locks can be programmed to be opened with several different keys where required.

CASINO LOCKING SYSTEMS

www.casinolock.com

CLS prefers to work with BiLock *Exclusive*, a high security locking system with patented key (2019-2034).

Advantages of the Locking system

Interchangeable lock-plug for maximum flexibility. Locks can be fitted at the various manufacturers by means of a special test key without having to use the original keys.

If a lock code has to be changed due to loss of a key or based on new procedures, cores and keys with a new code can be installed in the casino in seconds with a special Quick Change Core-key without having to dismantle and re-assemble the entire lock from the machine.

This new system features two additional codes on the key which provides unprecedented protection. Now the exclusive factory allocated codes mean unprecedented key control and ultimate security.

Enhanced drill, penetration and bump protection.

The addition of a high tensile steel anti-drill barrier as standard protects BiLock Exclusive plugs against drilling and other forms of penetration

Security Locks only opened with the original key.
 Restricted key cutting and key issuing.
 All different Casinos have different keys.
 One person controls all locks with one key only.
 Different key-head-colors, indicate different levels of access

Exclusive Patent Patented key (2019-2034), ensures that duplication is limited to authorised dealers

New Generation Patent Patented key 1999-2019

Installation time Lock size is based on lock-hole in slot-machine.
 A variety of different lock types are available to suit all different types of slot machines, table equipment and accessory products.

QCC Interchangeable Quick Chance Cores represent major advantages for the casinos:
 "Lock bodies" are installed into the machines by the manufacturer without original keys.
 "Lock plugs" with original keys are sent directly to the casino which can be installed in seconds on site.
 QCC minimizes lock installation time in the casino and provides additional security during the installation.
 Changes in lock combinations can be made in seconds by replacing the lock-plug when e.g. a key is lost or personnel or procedures change.

Service Excellent after sales service from both dealer and factory.

Technical specifications

Tamper resistant A high level of pick resistance by means of a patented key system with false holes in pins to resist picking.

Durability Fewer moving parts and stronger keys ensure a higher durability.

Simplicity Easy use and minimum maintenance.

Maintenance Easy access to lock-plug saves time.

Flexibility Many combinations means large master key systems re-pinnable lock-plug gives the lock a "longer life", when new procedures "change the lock" Minimum order quantity for custom-made locks when requested

Compatibility Standard cylinders can retrofit most hardware

1. Nr. SAM 3226 Q **BiLock's "manufacturing-key or test-key";**
Fits at all the locks (without the plug)

A: C4030 shaft collar; normal collar for push locks & cupboard locks
B: C4035 shaft collar; high collar for cupboard locks (doors > 24,0 mm)

22. Cover Plate;

C4040; 65 x 65 mm, for cupboard locks

23. Locking Plate;

A: C4050 locking plate; for hook lock, gold plated
B: C4055 locking plate; for hook lock, chrome

24. Lock Spray; C4060; special spray for locks and lock plugs

CLS trolleys

CLS develops all kinds of trolleys - either standard or custom made - to transport your valuable funds.

Our trolleys provide the perfect combination of functionality, security and cost-efficiency.

High quality wheels guarantee smooth and easy transportation, while ergonomic handles, powder-coated frames, magnets on the doors, rubber on the shelves and of course your own lock-plan security lock all provide a first-class and durable product.

CLS has a unique mechanism that securely locks the cash & tip boxes into the trolley. This is the most secure way to transport the boxes from the gaming floor to the vault/count room. No key is needed to lock the boxes into the trolley and the trolley key can then release all the boxes simultaneously for the count. This key is your second level of security.

Cash & Tipbox Trolleys

- Box locks automatically (no use of key)
- Central locking system releases all boxes
- 4 swivel wheels, 160 x 50 mm
- 2 ergonomic handles
- Top frame on tip box trolley for X-small boxes

CONFIGURATIONS

- Cash: 12 / 16 / 20 boxes
- Tip: 12 / 16 / 20 boxes
- Tip: 24 / 32 / 40 boxes
- Cash & Tip: 6 + 6 boxes
- Cash & Tip: 8 + 8 boxes
- Cash & Tip: 10 + 10 boxes

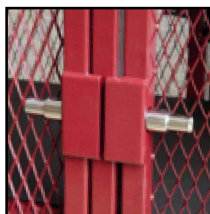

CLS BV trolleys are used when working with a double set of stacker boxes. The trolleys are heavy-duty format and available in different sizes. Each trolley is equipped with two or four doors (180 degree opening) for easy access. Each shelf holds 10/12/20 BV-boxes from any supplier.

BV-Stacker box Trolleys

BV-stacker box trolley, 40/48/60/80/100 pcs

- Size BV 60/80/100: 120/134 x 50 x 100/125/150 cm's (L x W x H)
- Size BV 40: 60/74 x 50 x 125 cm's (L x W x H)
- Size BV 48: 70/84 x 50 x 125 cm's (L x W x H)
- Size BV 60: 70/84 x 50 x 149 cm's (L x W x H)
- 2/4 doors, 180 dgr. opening, inc. magnet
- 1 or 2 push locks at each door
- Rubber on shelves
- 4 swivel wheels, 160 x 50 mm
- 4 ergonomic handles

CLS seal bag trolleys are used when working with a single set of stacker boxes. The boxes are emptied onto the top of the trolley next to the machines and the contents are put into a disposable, transparent bag. The bag is then dropped into the top opening of the trolley. Once in the trolley, access to the bags is prevented by the top security panels. The container holds 80-100 bags. This trolley is available with a larger/smaller size or double container, on request.

Seal Bag Trolleys

- Standard size: 90 x 45 x 90 cm (L x W x H)
- Drop-in opening at top, security shields for anti-picking of the seal bags
- Double side doors with 3 bars, 1 or 2 cam locks
- 1 ergonomic handle
- 4 swivel wheels, 100 x 35 mm

This trolley holds various components such as chip racks and bags with coins/tokens. It is used as a fill and credit trolley for the pit stands, tables and hopper refills. Four strong swivel wheels and handles on both sides ensure easy transportation. The trolley features two doors, 180 degree opening, each with two push locks for double security.

Pit Stand Trolleys

- Size: 90 x 56 x 98 cm (L x W x H)
- 2 doors each with 1 or 2 push locks
- 3 shelves
- 4 swivel wheels 195 x 50 mm

- Size: 92 x 56 x 100 cm (L x W x H)
- 2 doors each with 1 or 2 push locks
- 20 drawers each for 2 chip racks of 300 chips
- 4 swivel wheels 160 x 50 mm
- 4 ergonomic handles

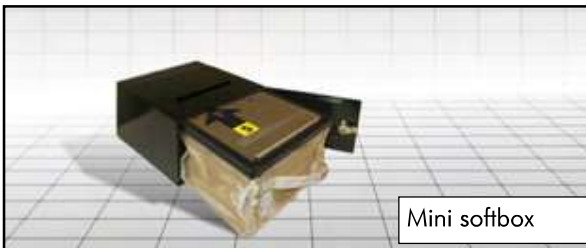

Each drawer holds two (Holland Casino) chipracks of 300 pcs.

The soft cash and tip boxes are developed to safe weight up to 75%. The advantages are its ergonomic aspect as well as less damages to table tops. The box is made from a very strong PVC coated nylon, PVC frame and stainless steel door. The sliding mechanism is also made of stainless steel for smooth operation. A security mechanism protects the opening in the box from fraud during transport. Together with the especially developed soft box trolley, you have a lightweight and secure solution for the clearance of your table boxes.

Soft Boxes & Trolley

- Shield large cash-box: 310 x 212 x 210 mm
- Shield midi cash&tip-box: 228 x 212 x 210 mm
- Shield mini cash&tip-box: 228 x 212 x 155 mm
- Trolley: 120/134 x 63 x 120 (L x W x H) cm
- Trolley holds 20 cash and 20 tip-boxes

CLS cage trolleys are used to transport the heavy chips securely between the cage and the vault. Four strong, high-quality swivel wheels and a handle ensure easy transportation.

Cage Trolleys

- A: This trolley has 4 drawers
- B: This trolley has 3 drawers
- The trolley has a central locking system which locks all drawers at once.
- The locking system can be locked with 1 or 2 locks.
- Size: 87 x 45 x 90 cm (L W H)
- Size drawer: 55 x 37 x 15 cm (L W H)
- Four swivel wheels 100 x 35 mm

- Custom made cage trolley
- Used under desk with a wooden drawer
- The trolley has a central locking system which locks all drawers at once.
- The locking system can be locked with 1 or 2 locks.
- Size: 65 x 50 x 63 cm (L W H)
- Size drawer: 56 x 47 x 16 cm (L W H)
- Four swivel wheels 80 x 35 mm

- Handle for easy transportation (see above)
- Handle can be lowered when used under desk

CLS chip tray trolleys are used to transport the heavy chip trays securely between the tables and the vault. This trolley protects your expensive trays from damage and extends their life-span.

Four strong, high-quality swivel wheels and handles on both sides ensure easy transportation.

Tray Trolleys

- Tray trolley for 12 standard chiptrays (TCSJH/Abbiati)
- Two doors on each side for easy access
- Central lock on each set of doors, also double locking possible
- Strong, high-quality swivel wheels for easy manoeuvrability in count room

Trolley for 2x7 special Holland Casino chip trays

In case you have special requirements, CLS develops custom-made trolleys. Below some examples

Custom Made Trolleys

1. Count room trolley

- 4 compartments for standard Bank cassettes
- 5 drawers each for two chip racks
- 5 lockable compartments for cash cassettes money changers : CCC, JPS, Scanmad, CAION

2. Table adjustment trolley

- 8 drawers for cash and chip racks

3. Cashbox trolley

- Two shelves for MARS automatic security cashboxes
- 10 compartment for CLS security cashbox

4. Tip box trolley

- Trolley for 24 standard tip boxes

CLS Seals & Seal Bags

CLS is a distributor of seals and seal bags produced by Harcor.

Harcor, in conjunction with casino gaming managers from around the world, have developed a range of bags for the secure transportation of gaming devices, e.g. roulette balls, dices, Pai Gow tiles, playing cards, etc. All bags are re-usable and sealable. The seals can be customized to suit individual departments and are available in a range of colours. Each seal carries a unique recordable sequential number.

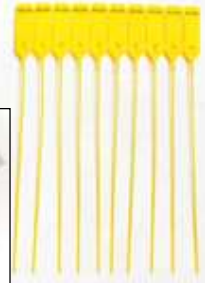

Easy Grip seal

Utilised at discard holders, wheel covers, note cassettes, CPU tray-doors
One direction sealing making it impossible to apply seal incorrectly. Seal made of Polypropylene.

- Minimum order: 1,000
- Numbered: yes, sequentially
- Breaking strength of approx. 15 kg
- Colour: yellow in stock
- Diameter tail: 3,0 mm
- Length tail: 190 mm / 140 mm operational

- Minimum order: 1,000
- Numbered: yes, sequentially
- Breaking strength of approx. 10 kg
- Colour: yellow and white in stock
- Diameter tail: 2,5 mm
- Length tail: 210 mm / 170 mm operational

CLS - Pull Grip seal

**SpringLok seal**

- utilised at discard holders, wheel covers, note cassettes
- Self locking all plastic padlock seal with unique hinge design
- Easy to close one hand operation
- Quick & easy to remove by twisting at break-point on spear
- Hinge springs open to show evidence of tampering
- Minimum order: 1,000
- Numbered: yes, sequentially
- Colour: yellow at stock (also blue, green, red)

**Harclip seal**

- Used for whole range of sealed bags and cassettes.
- Maximum security through double legs on seal.
- Minimum order: 1,000
- Numbered: yes, sequentially
- Colour: yellow/red/green/blue/white in stock.

**Envopack seal**

- Used to secure Reveal A Seal cover
- Minimum order: 250
- Numbered: yes, sequentially
- Colour: white in stock
(also available in blue, green, red, yellow)

**Cashier seal**

- Utilised at fi. coinbags
- Quick and secure
- With tear line for easy breakage
- Used with Harcor Tension Tool (A) for easy tighten
- Minimum order 1.000 pcs
- Numbered : yes, sequentially
- colour : red in stock
- diameter tail : 6 mm / lenght tail : 150 mm

CB6: Card bag for 6 decks of cards

- Elastic strips for 3 decks on each side.
- Zipper along 3 sides for easy use, TEC8 chamber secured using the Harclip seal
- Material: PVC coated nylon, Plastolene wide weaved/transparent
- Also available: Plastolene
- Size: 225 x 120 x 40 mm

CB8: Card bag for 8 decks of cards

- Elastic strips for 4 decks on each side.
- Zipper along 3 sides for easy use, TEC8 chamber secured using the Harclip seal
- Material: PVC coated nylon, Plastolene wide weaved/transparent
- Also available: Plastolene
- Size: 290 x 120 x 40 mm

K11: Glass see-through key bag with tag-holder.

- Also utilised for roulette balls and master aproms
- TEBCO chamber secured using the Harclip seal
- Size: 175 x 110 x 40 mm
- Glass see-through transparent

TOCB: Top open cash bag with tag-holder.

- Zipper along 3 sides for easy use, TEBCO chamber secured using the Harclip seal
- Size: 280 x 200 x 50 mm
- Colour: green in stock (also available in blue)

TOCB: Top open cash bag with tag-holder.

- Zipper along 3 sides for easy use, TEBCO chamber secured using the Harclip seal
- Size: 280 x 200 x 50 mm
- Glass see-through transparent

NB: Note bag

- Holds approx 150-200 notes
- TEBCO chamber, secured using the Harclip seal
- Size: 290 x 130 mm
- Colour: green in stock
(also available in blue and clear)

**HG4: Till bag with handles**

- Size: 457 x 356 x 102 mm
- TEBCO chamber secured using the Harclip seal
- Colour: blue in stock (also available in green)
- Utility bag
- No handles
- Tec8 chamber secured using Harclip seal
- Size : 380 x 280 x 100 mm
- Colour: blue in stock

**Reveal A Seal square**

- Secure cover for door locks, cabinets etc.
(fi. sensitive key safes).
- Sealed using the Envopack seal.
- Size: 52 x 52 x 15 mm

**Envopack Seal**

- Sequentially numbered
- Each container contains 250 pieces
- Minimum order 250 pieces

**The coin cassettes**

have been developed for bulk coin, replacing the old style cloth bags with a more modern look and function. In use in casinos worldwide the cassette is produced from a clear Polycarbonate material allowing for visual audits. The cassettes are stackable when full and nestable when empty which is ideal when space is at a premium.

Coloured lids secured using the Harclip seal

CLS security cash & tip boxes are available in three sizes. The boxes have the unique locking mechanism for our trolleys. The box locks automatically into the table shield and the slot closes automatically when released. The inner sliding mechanism is made of stainless steel for smooth operation. The box has a black powder-coated finish.

Mini security cash or tip box and shield

- size of shield : W x D x H: 215 x 212 x 166 mm

Security cash box and shield.

- Size of shield: W x D x H: 215 x 314 x 217 mm

Jumbo Security cash box and shield.

- Size of shield: W x D x H: 215 x 314 x 320 mm

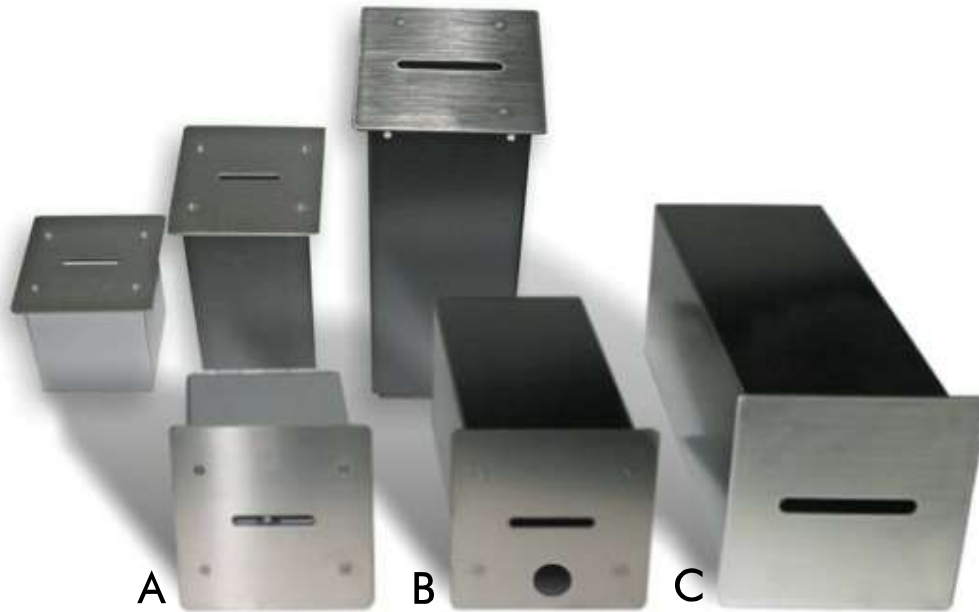

Sliding mechanism

- made of stainless steel
- locking mechanism at the back for CLS trolley

CLS tip box with attractive stainless steel top lid and bottom door.

Box slides into top opening and can be used as table-tip box and in reception and cage areas.

TIP BOX A

- Size of box: 100 x 100 x 100 mm
- Size of lid: 120 x 120 x 2,0 mm
- Size of opening: 50 x 6 mm

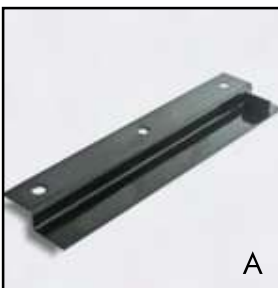

TIP BOX B

- Size of box: 100 x 100 x 200 mm
- Size of lid: 120 x 120 x 2,0 mm
- Size of opening: 50 x 6 mm / 80 x 10 mm
- with 20 mm lifting hole

TIP BOX C

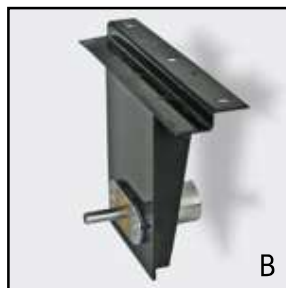

- Size of box: 120 x 120 x 300 mm
- Size of lid: 140 x 140 x 2,0 mm
- Size of opening: 80 x 10 mm / 50 x 6 mm
- with 20 mm lifting hole

With a set of rails the box can be used underneath the table top. (2xA)
With a special rail (B) the box can be locked to the table. (A+B)

CASINO LOCKING SYSTEMS

www.casinolock.com

Traka Touch Pro is a sophisticated key management system that has intelligence built in. It can operate as a standalone solution that requires no IT network or server to manage the database. Alternatively it can be networked with our enterprise solution 'TrakaWeb'. A full audit trail of all key transactions is retained within the system by the internal solid state memory. Management of the system had never been so easy.

Pro M-Series

M-Series cabinets are for 10 or 20 keys.
10 key system may be upgraded to 20 key system.

Full range of easily options.

- Size (h w d): 395.5mm x 846mm x 160mm
- Weight: 22.4 kgs without keys
- Traka Web Pro software needs to be ordered with the cabinets.

Pro S-Series

S-Series cabinets are for 10 to 60 keys.
Systems may be easily upgraded in modules of 10 key positions.
Extension cabinets may be purchased to extend the number of keys managed by a single system to 540 key locations.
Networking allows unlimited keys to be managed.

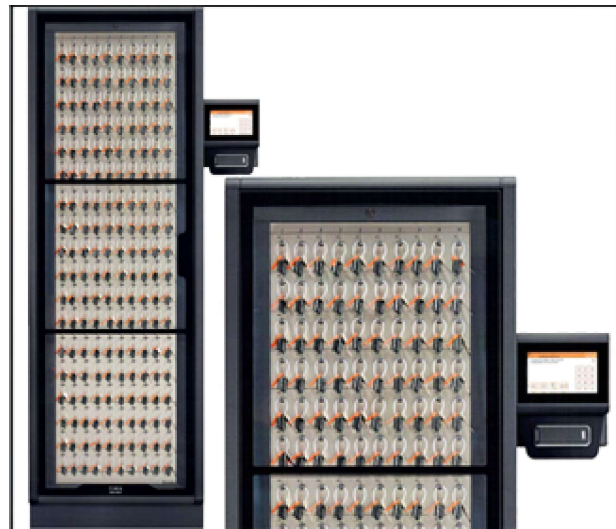

- Size (h w d): 751.5mm x 846mm x 160mm
- Including control pod: 675mm x 866mm x 140mm
- Weight: 35.1 kgs without keys
- Traka Web Pro software needs to be ordered with the cabinets.

Pro L-Series

L-Series cabinets are for 10 to 180 keys.
Systems may be easily upgraded in modules of 10 key positions.

- Size (h w d): 1939.7mm x 846mm x 160mm
- Including control pod: 1904mm x 823mm x 150mm
- Weight: 79.5 kgs without keys
- Traka Web Pro software needs to be ordered with the cabinets.

Important:

Parts for Traka32 16 bit systems will be supplied until 5/2025.
Traka32 16 bit systems from 2012 and younger can be upgraded to a Traka Touch system .

TRAKA Touch Specifications

General

- Keys are readily available 24/7
- Access by authorised users only
- 7" touch screen
- Full audit trail of all users and key transactions
- Easy access via PIN code, card reader and biometric fingerprint reader
- Battery backup
- Soft close-down with no data loss in the event of long term failure

Standalone

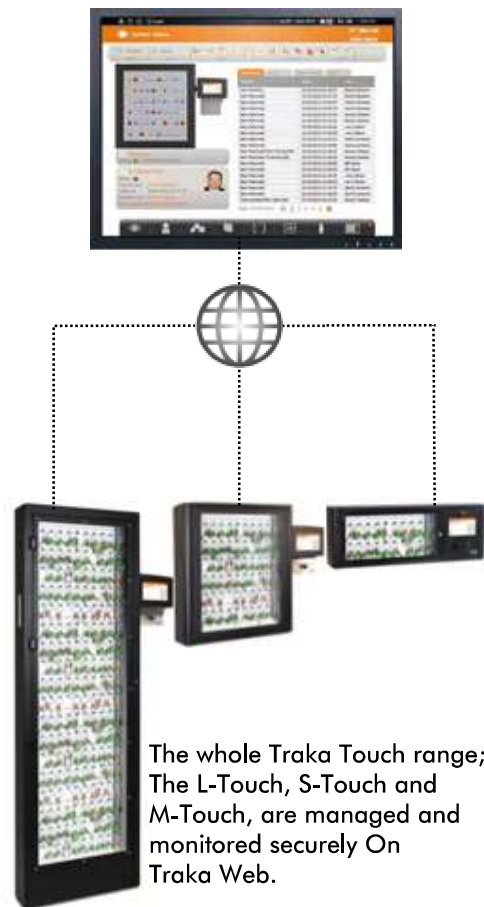

- Cutting edge key management solution that operates entirely of your IT system
- Standalone 'plug and play' system
- No network, PC or external connection required
- USB port for import/export of reports via memory stick
- Automatic data back up to removable SD card

Networked

- Full network capability and management through TrakaWeb
- Centralised administration and reporting

TRAKA-TOUCH SPECIFICATIONS M/S/L

- Power supply: Input 100-240V AC, Output: 15V DC
- Battery backup: (S): DC12V-4.2Ah and (L,M): 12V- 7Ah
- Power consumption: 35W max
- Cabinet material: Zintec steel
- Colour options: Black fine texture (TLP-F652-T)
- Door material: clear polycarbonate or solid metal
- Operating temp: Ambient, for indoor use only (-5 °C to +50 °C at 95% non-condensing relative humidity)
- Mounting Wall
- Receptor strip support: Locking, non-locking, with buttons, without buttons, double density (20 positions per strip), combination of both - all with Tri-colour LED's
- Users per system: 25,000 (more on request)
- Communications: Ethernet (TCP/IP) 10/100 MB
- Reader interface: Clock/data, Wiegand, Serial (RS232/TTL), PIN only
- Alarm interface: 3x1A/24V dry contact relay contacts for connecting to alarms, access control systems, CCTV etc.
- Certifications: CE, FCC, CSA, ROHS

The whole Traka Touch range; The L-Touch, S-Touch and M-Touch, are managed and monitored securely On Traka Web.

For more information on Traka and the benefits of intelligent key cabinets, Please contact Casino Locking Systems. By mail: info@casinolock.com or by phone: +31(0)10 228 16 51

Traka21's innovative plug and play system provides small to medium size businesses with the very latest in intelligent key management. Simple, efficient and cost-effective, Traka21 helps trace and account for every key or keyset, which are individually locked in place, ensuring that critical business operations are never jeopardised.

Operation

- Stand-alone Plug & Play solution with advanced RFID technology
- Touchscreen interface
- PIN access to designated keys or keysets which are individually locked in place
- Keys are securely attached using special security seals
- Simple to configure through setup wizard
- No requirement for network connection or PC
- Concealed robust fixing points allow secure wall fixing
- Mains operated with optional battery backup

Features

- User, key and access rights administration
- Multilingual functionality
- Screen based audit trail and reporting capability or export via USB port
- 1 robust, long-life iFobs with security seals
- 1 locking receptors with LEDs
- Robust and compact steel housing eliminates exposed hinges and obvious access points
- Manual override and door release functions in case of emergency
- Audible alarms

07.11.E100	550 x 380 x 80mm	100	5,5 kg
07.11.H200	550 x 380 x 140mm	200	9,5 kg

Once you have invested in a reliable key lock-plan, losing keys can still be a problem. CLS has several specific solutions for the loss of keys.

The Key Bak S48

is the perfect answer to your internal key loss problems.

Simply attach your keys to the Key Bak, and forget about ever losing your valuable keys again. It is also possible to use tamperproof rings as a key ring.

The Key Bak S48

Locks to carry more weight

Unlock to extend

Extension Cord: 1.2 mtr

The Key Bak Midi:

Holds up to 5 keys

Extension cord: 90 cm

360 dgr. rotating clip

The Key Bak Mini:

Holds 1-2 keys or

access control chip/card

Extension cord: 90 cm

Tamper-Proof flexible key rings; this product eliminates any covert key removal and substitution. Once sealed, ring cannot be opened without detection. Each ring is engraved with a unique serial number.

The Sealing Mechanism

secures important keys in minutes. Tamper Proof key rings require the use of a unique crimping tool in order to be sealed.

Key rings made of flexible cable protect your keys even better because the ring cannot be used as a "handle" to put too much force on the keys because of the twisting of the ring.

- Ring thickness: 2.6 mm cable, 4 mm seal.
- Diameter: 40 mm in stock
- (also available in 30, 50, 70, 90 mm)

Various coloured Labels

and different sizes of key rings to identify your keys and store them in the spare-key safe.

The Belt Clip is a clever solution, enabling the key ring to be easily clipped on and off.

Two-Part-Keyring

Can be used to remove the Key Bak from the tamper-proof ring with the keys and I-Fob when putting back in the TRAKA.

CLS develops and manufactures custom safes to securely store your valuables. These safes are very strong with a door of 8 mm steel and a frame made of 30 x 20 x 3 mm tube and body of 3 mm steel. The locks are special safe locks working on a high security BiLock profile cylinder which can be part of your lock-plan. A rosette protects the profile cylinder for extra security. A lock from the BiLock range can be added for a second person.

The advantage of such a custom safe is to save on the transportation of the chips and floats etc. to the vault.

Safe for chip racks integrated into pit stand furniture.
Detail: 4 drawers each for 4 chip racks of 200 chips

Safe for BJ chip trays integrated into pit stand furniture.
Detail: Shelves for 10 chip trays.

Safe for 10 standard TCS JH/Abbiati chaptrays or wooden
Attaché flat cases.
Detail: 5 drawers for each two units.

Safe used at cage. Picture shows 2 separate safes mounted together.
Each safe is suitable for one individual cage.
Detail: Shelves for 15 chip racks of 300 chips each

Standard safe with drop-in drawer, used in count rooms etc.
Detail: 2 BiLock cupboard locks on door.
size of compartment; 25 x 25 x 40 cms.
Also available in 25 x 50 x 40 cms.

CLS Guarantees a Smooth Installation

CLS coordinates for you the factory fitting of the locks as many as possible. Finally in the casino the locking system has to put in operation.

Just before the opening specialists of CLS come on site to fit the last locks. Then all the different coded lock-plugs are installed into the lock-housings. Other parts or equipment is installed like key safes, cash and tip boxes trolleys etc.

CLS ships together with the delivery of the goods their toolset which is a mobile workshop. Apart from all the necessary tools the toolset contains extra locks of all the models. These can be used for on site installation of extra lock positions which were forgotten. In this way CLS guarantees a smooth installation according to the present planning.

At the end of the installation a technical training is given to the responsible technical employees of the casino. The keys in operation and spare keys are organised in the key safes and the systems master/installations key is hand over.

CLS locking system can be easily maintained by the local instructed technicians. In this way the casino is self supporting and it is not necessary for the user to hire CLS for any work in the future. That's why a service contract is not needed.
